# GET YOUR PERFECT SOUND

Engineered to create a perfectly consistent tone, D'Addario Reserve Reeds are the product of naturally-grown cane and relentless innovation. Thanks to unrivaled quality and craftsmanship, Reserve Reeds are perfect for players looking to reproduce their sound at every performance.

Thick blank, heavy spine, standard tip thickness. Rich, warm, tone, ease of response, dynamic flexibility.

Thick blank, longer vamp, thicker tip. Offers depth and flexibility of both tone and response.

Traditional blank, shorter vamp, standard tip thickness. Great tonal clarity, evenness of sound, and immediate response.

## D'Addario

# RICO™

www.woodwinds.daddario.com

D'Addario started making reeds in 2004 and have worked tirelessly to provide superior reeds. They have invested millions of dollars of new technology and quality control. Every aspect of their reed-making has been re-developed and drastically improved. They grow 100 percent of the cane, enabling them to monitor and control their raw material, from growth to harvest. Healthy cane and state-of-the-art machinery have allowed D'Addario to create the most consistently manufactured single reed to date.

Gonzalez Reeds is one of the leading manufacturers of world-class hand selected clarinet and saxophone reeds. Since our beginnings in 1982, our mission has been to create the world's best woodwinds reeds. Reed quality is prioritized by choosing only the best raw material and then manufactured using the latest technologies. That is why Gonzalez hand selected reeds are now a brand synonymous with excellence in over 30 countries across the world.

**GONZALEZ REEDS** www.gonzalezreeds.com

**RC – Regular Cut – All Instruments**

RC reeds have a classic, French style filing. This leaves the scraping in the most vibrant area of the reed and produces a very brilliant sound. The material is stored to age for at least 3 years before it is put through the manufacturing process-the cane is extremely stable as a result. Its shallow shoulders have a closed half-moon shape which helps to maintain the tuning despite being an extremely flexible and spontaneous cane.

**FOF – Bb Clarinet only**

For Our Friends (FOF) was meant for those clarinetists that need a reed with a darker sound. They are made following an "American" cut. These reeds have thicker wood in the heart and the material is stored to age for at least 4 years before its manufacture. Because of its deeply carved shoulders, the reed is completely released in the bass sounds, where it vibrates like no other.

# FORESTONE

[www.forestone-japan.com](http://www.forestone-japan.com)

Forestone Reeds and all of our products are of the finest quality that can be found.

To produce our reeds, we decided to forego the long established method of machining in favor of injection moulding. After decades of research and experimentation we are able to achieve the desired thickness, creating the world's premiere synthetic single reed.

Traditional, Black Bamboo and our new Hinoki reeds are made of synthetic material containing more than 50% actual bamboo fiber. Forestone reeds offer superior resonance, projection, flexibility and feel that single reed players have come to demand from the best cane reeds.

Hinoki Reeds ..... \$30.95

The Forestone material is a mixture of polypropylene resin and cellulose wood fibre. More than 50 percent of the wood fiber used is bamboo. The material is tasteless, odorless and non-toxic. Forestone reeds maintain their strength and resistance over time. They vibrate well and hold the centre of the sound in a manner similar to that of a good quality cane reed.

# Focus

on your music, not your reed.

For generations, woodwind students have had to pre-moisten their reeds, deal with cracking, inconsistent cane strength and performance issues in various weather conditions.

Légère Premium Woodwind Reeds are manufactured with a patented process and synthetic material that virtually eliminates the need for pre-moistening. This means they are ready to play when you are. They are unaffected by weather and last for months – not days, so you can focus on your music, not your reed.

Available for saxophone, clarinet and bassoon.

The Silverstein Ligature is an innovative advancement of a classic concept: a minimalist cord-based ligature that liberated the most natural vibrations of the reed. A new cord design uses a thinner thread that allows for even less contact and pressure with the reed. The redesigned cord allows for greater control, a more dynamic sound, and a richer tone.

- Strongly improved grip
- Better sound dynamics
- Freer reed vibration allows improved harmonic partials
- Better pitch stability of throat tone
- Improved aesthetics
- Even More Harmonic Partial

Includes cap and user manual with warranty registration card.

## ROVNER LIGATURES – THE ORIGINATOR

Innovators in Clarinet & Saxophone Ligature & Mouthpiece Technology for the last 36 years. Used by renowned Classical, Jazz, Blues and Rock artists. There are many imitations - but there is only one Rovner! Available for all saxophones and clarinets. Supplied with black caps. Unless ordered otherwise, are supplied with metal fittings that match the instrument or the mouthpiece with which it is likely to be used.

### Dark

Gives a darker, richer tone quality.

### Light

Gives a brighter more open tone quality.

### MARK III

Maximum performance types that yield the best response, clearest, biggest sound, and playability of any ligature available.

### Versa

Feature a metal cradle which can be altered to create six different tones. Jazz and classical players alike appreciate the Versa's ability to personalize their sound. It is ideal for the player seeking to fine-tune the ligature's responsiveness and tonal qualities.

### Versa X

A Next Generation ligature with the addition of a newly-designed black-on-black layered metal cradle and Rovner's unique resonating ribs.

### Legacy

The powerhouse Legacy is for any player seeking the ultimate in "presence" and projection. It is enjoyed by the demanding jazz/rock/blues sax player delivering a high-energy performance, even in an amplified setting.

### Platinum

All metal ligature for any player seeking the ultimate in tonal purity and clarity. Initially preferred by classical players for its pleasing tonal characteristics, the Platinum is also enjoying a surge of interest from jazz players excited to explore its enhanced tonal spectrum.

### Star Series

This ligature represents the next generation Rovner. Born out of the desire to have "better performance, simpler design, less cost". This epitomizes, "Less is More". It's beauty is it's simplicity. Now anyone can enhance their playing performance.

### Van Gogh

Neutral in tone, the Van Gogh responds to simple adjustments that help the player paint exactly the musical picture he or she wishes to share with the audience. The Van Gogh is a masterpiece of a ligature that can do it all.

## Sax Key Clamps

www.hollywoodwinds.com

Designed to lightly hold the pad against the tone hole. Helps dry the pad to the shape of the tone hole and keeps the pad seated. Key clamps also help prevent damage to the pads and keys when the instrument is being transported. Made with a lighter wire to help prevent the possibility of over tightening. This also makes it easier to adjust the clamps after replacing a pad.

## Finger Rests

### Bo-Pep™ Rests & Saddles for Flute

Bo-Pep makes your flute much more comfortable to play. The Flute Finger Rest, Finger Saddle and Thumb Guide build out the body of the flute at the two most critical points: the positions of the left-index finger and the right-hand thumb. They open the grip to reduce tension and improve balance.

Bo-Pep products are easy to snap onto the flute and may be adjusted up or down to suit individual hands. No adhesives required. Each part comes in a draw-string sack that can be tied to the case handle for easy storage.

# *Hodge* Silk Woodwind and Brass Swabs

Hodge Products, Inc.

All Hodge silk swabs are made from 100% silk. Silk is very absorbent, wicking moisture from the instrument quickly and efficiently. Most uniquely, silk is also very compressible, making it possible to pull through instruments with large variations in bore size. In addition, silk is lint free.

**Perfection®**  
 planetary pegs

*So easy, even a child can tune a violin, viola or cello!*

Teachers, students, and professionals are all raving about the extraordinary Perfection planetary pegs, which feature revolutionary application of tried-and-true planetary gears, to ensure non-slip, non-stick tuning so smooth and effortless, that even a beginner can learn to tune (and stay in tune) without fear of slipping or sticking pegs.

- 4:1 gear reduction ensures easy and fast precision controlled tuning. Educators love the time-savings, seconds as opposed to minutes per instrument for tuning!
- Advanced engineering and materials, plus sealed gears for smooth, maintenance-free function and durability.
- Easy to install (uses exactly the same reamer that is used for conventional peg installation), safe for the instrument, and eliminates the need for fine tuners which improves instrument response.
- Perfection pegs look virtually identical to conventional pegs when installed, for aesthetic appeal.
- Extensively tested to ensure reliable performance and long life.
- Terrific for older players with arthritis or weakened hand grip.

# GelRest™

The ultimate in chin protection. Gelrest™ gently molds to your chin making your violin feel like it was made for you. The GelRest is even molded with special contouring that make holding the violin in the correct position much easier, without bruises or scarring.

Comfort is important, but looks are important too. That's why the GelRest™ is designed to blend in with the classic look of the violin. Since the GelRest™ is molded, we were able to base our molds on the classic chinrest shapes: Strad, Teka, Flesch no-hump, Guarneri 1/2 size, Mulko, and the ever-popular Guarneri.

# HUMITRON® Humidifiers

by *RDM*

Humitrons humidifiers are simple to use, effective, and are made of the most advanced non-vinyl and non-allergenic materials available. The custom extruded stems are soft enough to suspend securely in the f-holes, yet sufficiently sturdy to minimize contact with the interior of the instrument. The internal core absorbs up to ten times its weight in water and controls by gradual evaporative release.

**Don't Fret™ Finger Position Decals**

Patented Don't Fret Finger Position Indicators are decals which apply quickly and easily to string instrument fingerboards, and are mathematically designed, and precision-printed, to help beginning students quickly learn where to put their fingers. Extremely durable, yet removes cleanly from the instrument. Students love Don't Fret because they have easily identifiable markers, and teachers find it a flexible tool, responsive to numerous pedagogies. Don't Fret decals are also perforated, allowing the teacher to remove any of 3 sections separately.

"Protect tops and heads simply and cheaply"

Designed by a drummer for drummers. Simple, easy to use and very effective in protecting ANY size drum, varying sizes or same size stacked one on top of the other. Simply place three large Drum Stackers securely and evenly on the hoops of your bass drum. Then place the next size drum on top of the bass drum letting the bottom of that drum rim rest comfortably into one of the gullies on all three Drum Stackers. Gullies are spaced out in 1" increments allowing you to put any other size drum on top of the others. Do the same with the small Drum Stackers on every other drum being stacked. Simply turn the small Drum Stackers over and use them to stack drums of the same size.

**THIS ISN'T JUST  
AN INTRODUCTION  
TO A NEW KIND OF  
DRUMHEAD.**

**IT'S A FAREWELL  
TO THE REST.**

Introducing Level 360 – the revolutionary new drumhead technology that's staking a claim for the freedom of drummers everywhere. Freedom to spend more time playing not tuning, jamming not cramming, and expressing themselves with tonal range like never before. From here on out, Evans drumheads will be leading the charge across the board into a new era of innovation and superior performance, all-around – 360 degrees to be exact.

**Level 360. Tune in to the revolution.**

ATWHI White Wrapping Tape ..... **\$13.00**

**Rods®**

ProMark started a trend when they introduced the original Rods®. Over the years, other companies have tried unsuccessfully to duplicate their unique sound and feel. Voted one of the top 15 percussion products of the last 25 years, the Rods family produces a lower volume than sticks, but more attack than brushes...perfect for a variety of applications. When regular sticks are too loud, and brushes are too soft, Rods are just right. Handmade in the USA of select birch dowels.

AST100CR

AST200BC

AUSTIN ELECTRIC GUITARS ARE CLASSICALLY STYLED INSTRUMENTS MADE FROM SOLID TONE WOODS AND PREMIUM COMPONENTS.

The **Super-6 Series** offers a range of vintage tones from its humbucking pickups in the Pro Series and P90 style pick-ups in its '56 model. They are made with solid mahogany necks, rosewood fingerboards and have a warm and powerful voice.

The **AST100** and **ATC200 Series** deliver definitive single coil tones. All feature maple necks and fingerboards for articulate performance.

The finish on all Austin electric guitars is flawless and they come in a variety of great colors.

## Why guitar players choose *Elixir*® Strings

Unlike *Elixir* Strings, other strings become sabotaged by dirt and debris, which builds up between the gaps in the windings, contaminating strings and killing tone.

But with *Elixir* Strings, the patented ultra-thin coating acts as a physical barrier between the string and its damaging environment.

*Elixir* Strings is still the only brand to coat the entire string - protecting not only the outer string surface, but also the gaps between the windings.

As a result, *Elixir* Strings retain their tone longer than any other string, uncoated or coated.\*

No wonder guitar players choose *Elixir* Strings for their instruments.

Elixir® Strings is the only brand to coat the entire string, protecting not only the outer string surface, but also the gaps between the windings.

When Elixir® Strings burst onto the string scene in 1997, our patented coating technology was unique - and still is. Unlike Elixir® Strings, other strings become sabotaged by debris and skin particles, which get trapped between the windings when you play, contaminating your strings and killing your tone.

# STOP FLAKING IT!

**NO FLAKES, NO CRACKS, NO PEELING.  
NO MUFFLED TONE.**

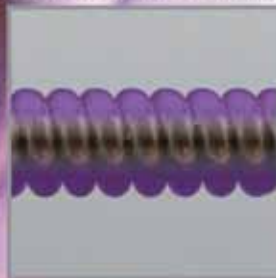

## THE FUTURE OF COATED STRINGS ARE NOT COATED.

Welcome to the next generation of extended-life strings. La Bella Vapor Shield™ strings are like no other string on the market because the surface of the string is modified during the treatment process. Coated strings are now a thing of the past.

Using a highly sophisticated Ionic Vapor Process™ developed by Acoustic Science™, proprietary compounds are activated in a glow discharge electromagnetic plasma, and the surface of all strings are modified. The result is a string protected from dirt, oil, residue, and tarnishing. Most importantly, string playability and life is extended without flaking or compromising tone.

**THE LA BELLA VAPOR SHIELD™ DIFFERENCE.** The technology behind La Bella Vapor Shield™ is unlike any other string. The entire surface and full-length of all strings are treated with a nucleated polymer vapor material that requires hours of complex prep and processing; no spraying or dipping. The results are unmatched:

**TONE. BRIGHTER** than typical coated strings AND non-treated strings. Unlike traditional coated strings, Vapor Shield™ plain steel AND wound strings are treated, resulting in even tone.

**FEEL.** The Ionic Vapor Process™ improves the string's surface properties, resulting in SMOOTHER plain steel and wound strings vs. both typical coated and non-treated strings.

**LIFE-SPAN.** Lasts 5x longer than non-treated strings.

**ENDURANCE.** No flaking after extended play. Impervious to grime, tarnishing and oil residue.

WOUND WITH AMERICAN WIRE. MADE IN THE USA.

The achievement of a family tradition dating back to 1640.

**TUSQ XL – Self-lubricating Nuts**

Sounds so good it must be illegal! Man made ivory. Compared to standard materials, you'll hear crystal clear bell-like high end, big open lows, and a noticeable increase in overall sustain. Unlike natural materials such as bone and ivory, TUSQ is consistent from piece to piece. Without a doubt, this is the best synthetic material on the market, and it cuts and files beautifully.

The Sidekick Passive Direct Box by Hosa Technology makes it easy to connect your guitar, bass, or keyboard directly to a mixing console! It features an isolation transformer that transforms an instrument-level signal to a line-level signal. It works with each of the following:

- Electric guitars, basses, and keyboards
- Pedal effects and effects processors
- Any electronic musical instrument with a mono phone output

Use the Sidekick to "go direct" for a pure, clean, noise-free tone that is perfect for Digital Signal Processing (DSP) or throw the INST/LINE switch to LINE position to allow your amp to drive the line for a natural, overdriven tone. Either way, it's your sound—all of it!

## System 10

Audio-Technica's System 10 PRO Rack-Mount digital wireless system provides the same interference-free operation in the 2.4 GHz range (outside TV bands) as the original System 10 wireless system but with expanded features and versatility. The durable half-rack chassis is equipped to house two receiver units that can be operated locally or released from the chassis and mounted remotely (up to 328 feet away) via Ethernet cable. Up to five chassis (ten receiver units) can be linked and used simultaneously (10 receiver units) can be linked using the RJ12 cable included with each system, creating a stable, multichannel system with the simultaneous use of up to 10 channels.

- Digital 24-bit/48 kHz wireless operation for ultimate sound quality and dependable performance
- Operates in the 2.4 GHz range – completely free from TV interference
- Receiver units can be docked in the chassis or mounted remotely (up to 328 feet away) via Ethernet cable for added versatility
- Up to five chassis (ten receiver units) can be linked and used simultaneously
- Each receiver unit can be paired with up to 10 transmitters, allowing users to instantly switch between different transmitter configurations
- Chassis' System ID Display shows RF signal level, system ID, transmitter battery level, and system link status
- Automatic frequency selection for seamless, interference-free operation
- Extremely easy operation with instantaneous channel selection, sync, and setup
- Three levels of diversity assurance: frequency, time & space
- Ground-lift switch helps eliminate audible hum caused by ground loops
- System 10 Stompbox offers a rugged, metal, pedal board-mountable receiver with foot switch, two switched TRS balanced 1/4" outputs & output mode selector.

Since 1976, K&S Music has provided quality band and orchestra instruments to musicians, educators, schools and music stores across the United States.

Established by two school music teachers, K&S Music was founded with the mission to provide customers with quality instruments, affordable prices and meticulous service.

More than thirty years later, K&S Music continues to build and improve upon its founding values. Having streamlined our facility into a full service musical organization, K&S Music offers a multitude of benefits for music students, educators, schools and music stores. Our in-house repair facility is staffed with top technicians and luthiers, while our well stocked warehouse offers customers the ability to rent or purchase a variety of instruments.

Looking towards the future, the employees at K&S will continue to go above and beyond to earn your trust and loyalty, while exceeding your expectations. We look forward to being part of your musical endeavors and thank you for giving us the opportunity to earn your business.
